

FRANCE

GENERAL PROFILE

AREA (2023)⁽¹⁾

606,410 km²

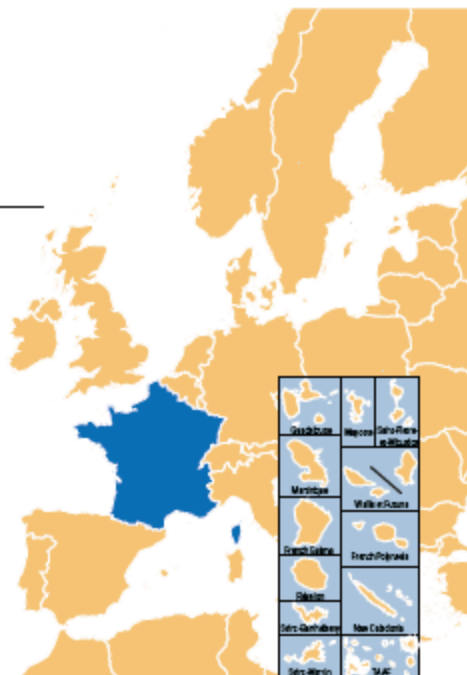

POPULATION (2025)⁽²⁾

68,882,600

inhabitants

113.6

inhabitants/km²

TERRITORIAL DISTRIBUTION (2025)⁽³⁾

living in rural areas

living in urban areas

living in intermediate areas

GDP AT PURCHASING POWER PARITY (PPP) (2024)⁽⁴⁾

\$62,557 per capita

MONETARY POVERTY (2024)⁽⁵⁾

15.9% (<60% of median income after social transfers)

HEALTH EXPENDITURE (2023)⁽⁶⁾

11.5% of GDP: **22.4%** for outpatient care, including **7.7%** for ambulatory medical care

DEMOGRAPHIC SITUATION

FERTILITY (2024)^[2]

1.61 children per woman aged 15–49

LIFE EXPECTANCY AT BIRTH (2024)^[3]

83 years (women 85.8; men 80.2)

HEALTHY LIFE EXPECTANCY AT BIRTH (2023)^[4]

63.8 years (women 64.1; men 63.5)

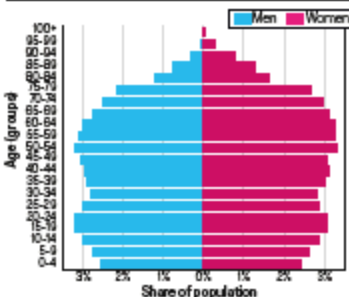

INFANT MORTALITY (<1 YEAR) (2024)^[5]

4.1/1,000 live births

AGE-STANDARDISED MORTALITY (2023)^[6]

794.8/100,000 inhabitants

Population pyramid (% of total population) – 2025^[7]

HEALTH CHALLENGES

LEADING CAUSES OF LOSS OF HEALTHY LIFE YEARS

(DALYS / 100,000 INHABITANTS) (2023)^[8]

Falls (**2,846**), Low back pain (**1,419**), Tracheal, bronchus, and lung cancer (**1,378**), Ischemic heart disease (**1,337**), Anxiety disorders (**1,108**)

TOBACCO (DAILY SMOKERS) (2019)^[9]

17.8% daily smokers

ALCOHOL (2022)^[10]

11.2 liters of pure alcohol per inhabitant aged ≥ 15 years

OBESITY (2019)^[11]

14.4% have a BMI > 30 (13.6% of men, 15.2% of women)

PHYSICAL ACTIVITY (≥15 YEARS) (2019)^[12]

48.8% inactive (0 minutes)
27.4% perform at least 150 minutes per week

DIET (2019)^[13]

25.2% do not consume any fruit or vegetables daily;

19.5% consume 5 or more portions

MENTAL HEALTH (2019)^[14]

10.8% have depressive symptoms

SUICIDE (AGE-STANDARDISED RATE) (2021)^[15]

11.8 per 100,000

(men 18.0 per 100,000; women 6.8 per 100,000)

CHRONIC CONDITION (>16 YEARS) (2025)^[16]

41% have a chronic health problem

SICK LEAVE (2019)^[17]

31.8% had at least one sick leave episode during the year

AIR POLLUTION (2023)^[18]

160,874 years for 14,741 premature deaths
